

## WDC Weight Drop Controller

- The Weight Drop Controller (WDC) System from Seismic Source Co. is a completely integrated solution for controlling an accelerated Weight Drop Unit (Thumper)
- The WDC unit consists of the following:
  - Weight Drop Relay Control System
  - Radio Trigger Module (RTM)
  - Remote Control Box
  - Radio
  - Hammer Switch
- The WDC provides following features:
  - Automatic cycling with user entered number of hits
  - Time Delay Display (Time from fire command to hit)
  - GPS interface for position and timing
  - Remote Control Box
- The WDC software allows following features:
  - Controlled performance of the Weight Drop Units from the recorder

Example of  
RTM  
and WDC  
installation
